## Why Choose this Training Course?

Data Governance and Compliance is the specification of decision rights and an accountability framework to encourage desirable behavior in the valuation, creation, storage, use, archiving and deletion of information. It includes the processes, roles, standards and metrics that ensure the effective and efficient use of information in enabling an organization to achieve its goals. The General Data Protection Regulation (GDPR) is coming into law across Europe in 2018 and will lead to major changes to Privacy and Data Protection around the world.

This course provides participants with in-depth knowledge in Data Governance, Privacy and Data Protection and practical skills to help manage, plan, support, analyze, deliver and support an ever-growing volume of data and information within their organizations. The course addresses international best practices, address industry regulations, legal requirements, information compliance, auditing and cyber security standards.

More specifically, the course covers best practices and international standards including ISACA, ISO 8000 - International Data Management Standards, Data Analysis, Data Analytics, Big Data, Database, Data Warehouse, Reporting, Information Compliance, Data Security based on ISO27001 – Information Security, Master Data Management (MDM), Metadata Management & Records Management Compliance. The course also reviews Privacy and General Data Protection Regulation (GDPR) and references cases of major data breaches such as Facebook and Cambridge Analytica.

As part of the course, participants conduct group and individual exercises and learn from industry best practice case studies. The best practice can be applied to improve data management within their own organizations.

## Course Methodology

The material used in the training course will be based on exercises as well as regional and international case studies. Participants will frequently work in pairs with one another as well as in larger teams.

## Course Objectives

**By the end of the course, participants will be able to:**

- Understand how data and information can be managed more efficiently and effectively within organizations to tackle Privacy, Data Protection and Cyber Security threats and risks
- Recognize Data Governance controls, policies and strategies to capture, manage and securely dispose of business data and records
- Develop action plans to manage information compliance, audits, legislation and regulations through review of information and information management controls
- Set up and implement a Data Governance project, including addressing roles and responsibilities, risk management and improving business processes
- Manage data to international best practices ISACA, ISO 8000 - International Data Management Standards, Privacy and Global Cyber Security

## Target Audience

This course is suitable for IT professionals, document controllers, auditors, site administrators, general management and anyone tasked with managing and protecting data and information. This also includes professionals already familiar and involved with data management and seeking to build on their fundamental principles of managing data, information and records.
