Course content

Why Attend

Why Attend Risk-based auditing enables organizations to focus audit resources on the areas of highest risk and greatest value. Instead of reviewing activities in isolation, modern auditors are expected to assess strategic, operational, financial, and compliance risks while supporting stronger governance and decision-making. This course provides participants with practical tools to develop risk-based audit plans, evaluate enterprise risk management processes, and conduct effective audits of complex business activities.

Course Methodology This course uses an interactive and practical approach through presentations, case studies, audit workshops, risk assessments, group discussions, practical exercises, and real workplace examples.

Course Objectives

- Understand modern risk-based auditing principles
- Link internal audit with enterprise risk management
- Evaluate risk management processes and controls
- Develop strategic and annual audit plans
- Apply risk-based auditing techniques in practice
- Use audit technology and data tools effectively
- Audit complex and high-risk activities
- Deliver value-added audit recommendations

Target Audience

- Internal Auditors
- Audit Managers
- Risk Management Professionals
- Compliance Officers

Course content

Target Audience

- Governance Professionals
- Finance Controllers
- Anyone involved in assurance and control functions

Target Competencies

- Risk-Based Auditing
- Internal Audit Planning
- Risk Assessment
- Control Evaluation
- Audit Reporting
- Strategic Thinking
- Governance Review
- Performance Analysis

Course outline

Day 1: Risk Based Auditing in the Modern Era

- The modern risk-based audit (RBA) approach
- How risk-based audit has changed the face of auditing
- Importance of dealing with audit risks, not only business risks
- RBA and ERM (Enterprise Risk Management)
- ISO 31000 international risk standard
- Auditing strategic risks

Day 2: Evaluating the ERM Process

Course content

Course outline

- Risk workshops
- Other methods of risk identification
- Root cause analysis and Monte Carlo analysis
- Assessment of risk mitigation
- Determining preventative, detective, and corrective controls
