## Why Attend

Why Attend Big Data has become a strategic asset that helps organizations improve decision-making, enhance customer experience, reduce costs, and identify new growth opportunities. Managers do not need to be data scientists, but they must understand how data creates value, supports strategy, and drives competitive advantage. This course provides participants with practical knowledge of Big Data concepts, business applications, analytics processes, and leadership approaches for data-driven organizations.

**Course Methodology** This course uses an interactive and practical approach through presentations, business case studies, group discussions, dashboards, strategy workshops, and real organizational examples.

## Course Objectives

- Understand Big Data concepts and business relevance
- Learn the data analytics lifecycle from discovery to action
- Identify opportunities for data-driven decision-making
- Understand structured and unstructured data sources
- Explore cloud and digital platforms supporting Big Data
- Apply Big Data use cases across industries
- Address privacy, governance, and ethical considerations
- Build strategies for creating value from data assets

## Target Audience

- Managers and Executives
- Department Heads
- Business Leaders
- Strategy Professionals

# Course content

## Target Audience

- Project Managers
- Digital Transformation Teams
- Anyone involved in data-driven decision-making

## Target Competencies

- Strategic Thinking
- Data Literacy
- Decision-Making
- Digital Leadership
- Business Analysis
- Innovation Management
- Data Governance
- Performance Improvement

## Course outline
