## Why Attend

### Course Introduction

This Cybersecurity and Enterprise Resilience training course is designed to equip professionals in both public and private sectors with a comprehensive understanding of cybersecurity threats, their impact, and appropriate response strategies from various organizational perspectives.

Suitable for employees, operational managers, and strategic managers, the course enables participants to collaborate effectively with IT departments and security experts to ensure secure business systems and data.

This training course will feature:

- Increase awareness of the current state of cyber threats and their implications
- Understand various types of systems security threats
- A framework to develop a strategy to respond to security threats
- Legislation, policies and regulatory frameworks relevant to systems security and data privacy
- Understand emerging technologies implications on social, organizational and technical systems

## Course Objectives

By the end of this training course, participants will be able to:

- Identify and understand different types of cyber security threats
- Plan to respond to these threats
- Start designing for security when thinking about IT systems and data
- Apply good practices in planning for systems security and threats handling
- Increase the awareness of legal and regulatory frameworks relevant to data and systems use

### Who should Attend?

This training course is suitable to a wide range of professionals but will greatly benefit:

- Business departments and unites managers in private and public organizations

# Course content

## Course Objectives

- Professional users of IT systems
- IT developers
- Digital business strategic managers
- Digital entrepreneurs

## Course outline
