Course content

Why Attend

Course Introduction

For organizations to truly excel, they need individuals who can adeptly balance operational strategies with change management. These individuals must be supported by a robust culture, relevant processes, and effective management tools.

This Enterprise Project Management & Business Performance training course is designed to build essential knowledge, skills, and competencies in both project management and business performance management.

By enhancing specific projects and operational activities, participants will also contribute to significant improvements in the overall success of the enterprise.

This includes better outcomes for customers and key stakeholders through the implementation and reinforcement of a culture that leverages the full potential of everyone in the organization.

Course Objectives

This training course enables attendees to:

- Understand What Project Management is Really About
- Initiate, Plan, Monitor, Control and Close Projects
- Manage Quality, Time, Cost, Resource and Risk on Projects
- Monitor and Control Business Performance
- Analyse and Improve Business Processes
