Why Attend

Why Choose Operational Excellence in Crisis Management and Contingency Planning Training Course?

This Operational Excellence in Crisis Management and Contingency Planning training course shall effectively help the organisation to develop a standard methodology for organizing, drafting and implementing emergency preparedness and contingency plans.

The course was prepared to ensure that all delegates will gain the best practices in developing, assessing and determining consequences of contingency plans, and helps participants identify the most common weaknesses found in many crisis management plans.

This attractive training course was tailored to fit with different kind of industries where the organisation reputation before, during and after the crisis are well maintained.

The course will offer to the attendees the professional methods of identifying, preventing, and damage controlling at different types of crisis situations.

This Operational Excellence in Crisis Management and Contingency Planning training course will feature:

• Latest theories of identifying potential risks or situations

• Developing a standard methodology for organizing, drafting and implementing emergency preparedness and contingency plan and procedures

• Dealing with various stages of a crisis

• Damage control guidance

• Crisis management team training and compliance

What are the Goals?

This course helps participants identify potential risks or situations that may precipitate a crisis or emergency and learn approaches on how to respond to such incidents.

Course content

Why Attend

The Course is to enable students to understand and apply the principles of emergency response planning and crisis management. It considers the need for emergency and crisis response planning and an integrated approach to emergency management. It is mainly To plan and prepare for effective Emergency Response Plans (ERP) that mitigates the potential consequences of an Incident to people (local community and personnel), environment, assets and reputation, and enables normal operations to be resumed efficiently.

By the end of This Operational Excellence in Crisis Management and Contingency Planning training course, participants will be able to:

- Define crisis management
- Describe the stages of a crisis
- Apply best practice in putting crisis management into action
- Develop contingency plans
- Enhance common crisis management plan weaknesses
- Recognise how to establish a crisis management team
- Analyze the psychology of crisis management decisions
- Describe the emergency response scenarios
- Implement damage control
- Define the requirements and importance of Emergency and Crisis Response Management
- Discuss aspects of integrated emergency management
