## Why Attend

### Course Introduction

"Project managers are the most creative professionals in the world; we have to figure out everything that could go wrong, before it does"

Project management professionals are increasingly called upon to make critical business decisions under pressure in complex, uncertain, and dynamic environments. This Project Risk, Uncertainty & Decision Analysis training course addresses advanced concepts in Project Management and Risk Management to equip participants with the tools and strategies needed to navigate these challenging situations. The course offers a systematic approach to the project management process, designed to facilitate the effective and efficient achievement of business objectives. Participants will gain practical insights into developing a comprehensive project plan, crafting a robust risk management strategy, and creating a stakeholder management strategy. Tips, techniques, and strategies will be provided to support these efforts and enhance your ability to manage projects successfully in a rapidly evolving business landscape.

## Course Objectives

This training course aims to enable participants to achieve the following critical objectives:

• Obtain a Fundamental Understanding of Project Management Concepts

• Prepare and Execute an Effective Project Plan

• Identify and Analyse Project Risk

• Apply Effective Strategies to Address Typical Project Issues

### Who should Attend?

This training course is suitable to a wide range of professionals but will greatly benefit:

• Professionals Who Make or Support Project Decisions and Would Like to Be Able to Develop and Justify Effective Solutions

• Project Management Professionals and Supporting Personnel

• Internal Auditors and Management Accountants

# Course content
