Why Attend

Why Choose Safety Leadership in the Oil and Gas Industry Training Course?

Without question, safety is a critical factor in the Oil, Gas and Petrochemical Industries, and this requires excellent leadership, as well as adopting the right safety behaviours. Safety Leadership applies to all levels, and all disciplines in the organisation, and is important in setting the standards and appropriate safety behaviour for all. This Safety Leadership in the Oil and Gas Industry training course has been specifically designed to equip Management, Technical, Supervisory, and HSE professionals in the Oil and Gas sectors with the knowledge, skills and understanding to become effective Safety Leaders in this critical, high hazard industry.

On this Safety Leadership in the Oil and Gas Industry training course you will learn about utilising powerful leadership and management techniques to control your work environment, how to pro-actively influence others; identify and control risks and hazards, as well as create a climate and culture for improved safety using key behavioural safety coaching and techniques.

This Safety Leadership in the Oil and Gas Industry training course is essential for those operating and working in high hazard and critical safety operations.

This Safety Leadership in the Oil and Gas Industry training course will feature:

- How to utilise management and leadership criteria to improve your Safety Leadership
- The key interpersonal and behavioural safety techniques to influence and improve overall safety
- Strategies to prevent incidents and accidents, and the correct procedures for handling these
- Using advanced Safety Coaching techniques to increase individual safety performance
- Help create, adapt and improve the safety climate and culture of the organization

What are the Goals?

By the end of This Safety Leadership in the Oil and Gas Industry training course, participants will be able to:

- Recognize & understand the roles and responsibilities of Safety Leadership

Course content

Why Attend

- Employ leadership and team working techniques to effectively manage safety on site
- Apply behavioural safety techniques to improve communication and safety culture
- Identify and determine critical risk identification and hazard analysis to prevent accidents and incidents
- Provide a continuously improved safety culture across the organization

Who is this Training Course for?

This Safety Leadership in the Oil and Gas Industry training course is suitable to a wide range of professionals but will greatly benefit those who operate in a technical, managerial or supervisory capacity in the sector.

- Technical personnel
- Engineering/Project/Process personnel
- Supervisors
- Team leaders
- Safety personnel

Course outline

Day one: Becoming a Safety Leader in the Organisation

- Safety critical operations and risks in the Oil and Gas Industry
- Importance of a Positive Safety Culture in the Industry
- Safety Leadership v Safety Management
- From Technical/Supervisory leader to a Safety Leader
- Behavioural Safety: concepts and the impact on safety
- Understanding ''at risk'' behaviours (Violations and Errors)

Course content

Course outline
