## Why Attend

This course presents a blend between strategy and quality to help participants develop the right skills to plan their organization's quality strategic plans. The course will take participants through the history of quality and strategy and link them with practical applications. Participants will learn to analyze current organizational status and identify gaps and future needs. The course will also examine the strategic planning process, from initiation to the selection of initiatives. Moreover, the identification process of quality Key Result Areas (KRAs) will be discussed. Participants will leave with the tools, skills, and knowledge to start their journey to strategize for their quality departments and produce deployment plans.

This course uses workshops, case studies, and group debriefs to help participants understand various strategies, quality concepts, and applications. The course also features hands-on experience to illustrate the strategic planning process from A to Z and the process of drafting a quality plan. Various videos on strategy and quality applications support this course.

Team discussions and presentations are used throughout the course to foster participants' understanding of the strategic planning process for quality deployment in organizations.

By the end of the course, participants will be able to:

- Define quality and strategy concepts highlighting the main components of quality strategic planning
- Analyze the current quality situation to draft vision and mission statements
- Generate strategic goals and objectives for their quality department
- Evaluate strategies and draft an operating plan
- Examine how to measure the success of a quality strategy

All quality managers and staff involved in influencing, formulating, or supporting the long-term planning and strategy of the quality department or organization, as well as those responsible for linking, measuring, and improving the performance of others. The course is also suitable for employees targeted for development or promotion within the quality function.

- Strategic planning
- Quality management
- Management and planning

# Course content
