Why Attend

Why Choose Knowledge Management for the Oil, Gas, Petrochemical & Energy Industries Training Course?

Every successful organisation needs to attract, retain and fully utilise talented people.

This practical Knowledge Management for the Oil, Gas, Petrochemical & Energy Industries training course will show you what's needed and also how to gain strategic advantage through new approaches in knowledge management.

This is an exciting HR training course for anyone interested in or responsible for improving employee performance throughout the organisation.

Knowledge management is essentially about getting the right knowledge to the right person at the right time.

This in itself may not seem so complex, but it requires knowledge about 'best-practices' in recruitment, retention, succession planning, talent management and people motivation.

This training course will feature:

- Ways you can significantly improve your recruitment and retention strategies
- Proven approaches to achieve retention of valuable people
- Avoiding silo mentality in your organisation
- The psychology of motivation
- How to upgrade your performance appraisal system
- A simple to understand approach to succession planning

What are the Goals?

By the end of This Knowledge Management for the Oil, Gas, Petrochemical & Energy Industries training course, delegates will be able to:

- Understand best practices in recruitment and selection

Course content

Why Attend

- Explain the limitations and benefits of psychometric testing
- List how differentiation can significantly improve retention and motivation
- Describe the core components of an assessment centre
- Discuss the core principles of motivation

Who is this Training Course for?
