Course content

Why Attend

Course Introduction

Are you prepared to navigate the digital tsunami and lead your organization through the challenges of digital disruption, or risk becoming obsolete? This course examines the scope and impact of disruptive digital transformation and provides guidelines for becoming a successful digital enterprise leader, capable of driving significant improvements in business performance.

The Certificate in Digital Transformation training course will help you build the foundational elements for digital transformation, enabling you to harness game-changing technologies and apply them effectively to your business.

By developing crucial digitalization skills, you'll be equipped to implement digital transformation initiatives that ensure your organization not only survives but thrives in the digital age.

Course Methodology

This training course will utilize a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented.

The facilitator will provide interactive presentation that incorporates slides, videos, group discussion, and practical exercises to examine all aspects of the topic.

Who should Attend?

This training course is suitable to a wide range of professionals but will greatly benefit:

- Professionals who want to learn effective techniques to adopt successful digital transformation
- Team leaders, supervisors, section heads and managers in business and government
- Professionals who have an interest in a management position
- Technical professionals including those in Maintenance, Energy, Engineering & Production
- Researchers and educators in the arena of digitalization and digital transformation

Course Objectives

Course content
